By DBI Staff Writer

The LA auto show is one of the largest auto shows in the world, featuring 1,000 vehicles on display, free test drives, interactive drive experiences, virtual reality & much more. This year, Dodge will deliver the Dodge Challenger SRT Hellcat Redeye Widebody. The Hellcat pumps out 797 horsepower and can take off from 0 to 60mph in 3.7 seconds. At 115mph, it flies through a quarter-

mile in just 11.7 seconds. After decades of anticipation, Chevy will display their first mid-engine vehicle in Corvette history. That's right, a mid-engine 2020 Chevrolet Corvette Stingray V51 pictured on the right. This V8-powered Stingray siphons 495 horsepower. In 2.8 seconds, this Stingray will be soaring at 60pmh. Porsche will boast their first ever

pure-electric vehicle. Pictured on the left, the 2020 Porsche Taycan Turbo S will be the first car to run an 800-volt electrical system. A 270kW DC fast charger can bring the battery from 5% to 80% in only 22 minutes. Or charge it for just 5 minutes and get 60 miles of range! The vehicle rockets to 60mph in 2.6 seconds. It can fly up to 165mph. Lexus LF-30 concept vehicle pictured below is a sleek four-motor electric

crossover. With 536 horsepower, the LF-30 zooms to 62mph in a mere 3.8 seconds and can run up to 124mph. The vehicle has a self-parking feature and can even drive from the driveway to your front door on command. Be sure to check out these cars and more at the 2019 LA Auto Show. Buy your tickets at laautoshow.com/tickets before 11/22 for a discounted price.
